

Well services

At Sparrows, we understand that no two clients have the exact same needs and therefore, Sparrows' well services products follow an engineering philosophy of heavily custom-tailored packages based on specific client requirements.

Putting your trust in our specialists gives you assurance in the safety and reliability of your operations:

- Less operational time required
- Over engineered solutions to mitigate risks
- Long term service agreement options
- Global network and support
- Competitive pricing
- 24 hours a day 365 days a year on call to you
- An engineering history since 1946.

Integrated management solutions

ESP FIELD CABLE SPOOLERS

Sparrows offer one of the most robust and user-friendly spooler designs in the region. High quality parts are incorporated to ensure less down time and a much higher service life. Designed to operate in the harsh conditions of the Middle East with ease.

Sparrows' spoolers are designed to make operations much more efficient, thus saving countless man hours in the long run.

- Electric / hydraulic drive options
- Standard / automatic level wind arm options
- Field cable / workshop spoolers
- Zone 1 / 2 applications
- Electric / Diesel Hydraulic Power Unit (DHPU) driven
- New builds / refurbishment.

BATCH MIXERS

Improving your mixing process through innovation, engineering precision and long-term customer commitment.

- Skid / trailer mounted
- 2X30 to 2X100 BBL
- Refurbishment.

PRESSURE PUMPING UNITS

Sparrows is committed to extending the life cycle of all pressure pumping equipment, we provide refurbishment / overhaul services that restores each unit's service life and efficiency.

We can undertake repair of most engines, transmissions, pumping units, upgrading unit controls and servicing cooling systems.

- Pumping unit (twin / single)
- Cementing unit
- Refurbishment.

COILED TUBING DRILLING UNITS

Our team can provide Coiled tubing Drilling Unit (CTDU) solutions due to the multiple resources in hand. A strong design team in the Middle East supported by local powerhouse design teams in the UK and India, a highly capable fluid services division with proven track record to support all hydraulic component requirements, and a state-of-the-art fabrication facility from our local sponsor, Abu Dhabi Oilfield Services (ADOS).

- New builds / refurbishment.

C-PUMP SKID PACKAGES

Sparrows pump skid packages are engineered with safety and convenience in mind, systems can be adjusted, modified, and relocated with ease.

- Engine / electric driven
- DNV certified / compliant designs
- Direct drive / clutched option
- New builds / refurbishment.

SPECIALISED SKID PACKAGES

As specialists in mechanical, hydraulic, electrical, structural, reliability, and automation and control engineering we deliver a broad range of structured and bespoke solutions to customers in the market.

Our commitment to consistently providing high quality engineered products and services through our 'above all, one standard' approach to quality and safety means delivery is assured with the Sparrows Group.

- Chemical injection skid packages
- Metering skid package
- Variable Speed Drive (VSD) skid package
- Hydraulic skid packages
- New builds.

We support you to...

MAXIMISE UP-TIME

Everything we do optimises the performance of your safety critical equipment.

SOLVE ENGINEERING CHALLENGES

We always have a full range of experienced specialist engineers at hand.

MAXIMISE EFFICIENCIES

Our turn-key fully managed contracts provide you with economies of scale globally.

IDENTIFY AND MITIGATE RISKS

We support you to proactively manage risks, optimising reliability of your operations.

Project services

NEW BUILDS

Partnerships, including the one with ADOS, provide Sparrows access to state-of-the-art fabrication facilities. This allows us to produce new build equipment to an extremely high standard.

REFURBISHMENT / OVERHAUL

Ageing equipment can be partly or fully refurbished to extend its life span and improve operational integrity. We support you in analysing what requires refurbished to achieve your operational objectives.

Minor scopes can be refurbished on in-situ to minimise the impact on operations and larger scopes such as a full pumping unit or spooler can be undertaken at our local workshop facilities.

MAINTENANCE / SERVICING

We deliver predictive maintenance and servicing for our key product lines including, spoolers, pressure pumping units, batch mixers, etc.

We provide the option of special service agreements to our clients to ensure minimum down time while improving reliability and safety.
